

## • Access® 2 Immunoassay System

With an intuitive operator interface, enhanced sample handling and innovative menu, the state-of-the-art Access 2 system delivers new levels of laboratory efficiency, standardization and cost effectiveness. A broad menu of high quality assays from Beckman Coulter, plus new, productivity-enhancing features on the Access 2 offer laboratories a flexible option for immunoassay testing.

### Product Features

---

#### Simplify System Operation

- New touch-panel user interface improves data & sample management
- View rack and run completion time on screen, in real time
- Quickly view information on requested test, pending work and test results
- Perform user-defined reflex testing to eliminate repetitive, manual processes
- Check status of required supplies
- Runs on Windows® NT software for optimal operator effectiveness
- Take advantage of enhanced on-board quality control

#### Network and sample handling capability improve productivity

- Link up to four systems through a single LIS interface for greater efficiency
- Instruments share information such as test requests and test results
- Streamline workflow with the system's flexible sample handling, using bar-coded primary and/or aliquot tubes

#### Innovative menu and accurate test results

- Cardiac panel includes AccuTnI™ Troponin I and BNP\*
- Magnetic particle separation with chemiluminescent detection technology achieves wide analytical range and fast assay processing
- Twenty-four resident assays with continuous random access and STAT capability
- On-board refrigeration enhances reagent stability

#### Advanced technology for system support

- "Intelligent Service," Beckman Coulter's unique remote diagnostic program, offers laboratories exceptional service and support
  - System experts can monitor instrument event logs, QC information and calibration data from a remote location via modem
  - Specialists can flag potential problems, pinpoint current issues and determine instrument trends to reduce service needs
-
