

VIDAS®

VIDAS is an automated, multiparametric immunoassay system. This uniquely designed testing device stores the calibration in the analyzer's memory, thus optimizing the cost-per-patient result. Plus, with its ready-to-use reagents, minimum maintenance, ease of use and uni/bi-directional interface, labor cost is also optimized. Automation and kinetic assay reactions yield rapid turnaround time.

The VIDAS system allows for a flexible work routine with:

- a sectioned architecture
- an add-on modular system
- more efficient workflow
- batch testing (up to 100 tests/2 hr.)
- single sample testing
- STAT capability
- multiparametric testing

The quality of the VIDAS is unsurpassed—it is automated, has no carryover, uses fluorescence reading, is self-testing and has ready-to-use bar-code-labeled reagents.

General Information

The Automated, Multiparametric Immunoassay System:

Productivity

- Optimized Cost per Patient Result
 - Uniquely designed testing device
 - Calibration stored in the analyzer's memory

Productivity-Con't.

- Optimization of Labor
 - Ready-to-use reagents
 - Minimum maintenance
 - Ease of use
 - Uni- or bidirectional interface to LIS

- Rapid Results
 - Kinetic reactions
 - Automated
 - More efficient workflow

Flexibility

- Flexible Work Routine
- "Sectioned" architecture
- "Add-on" modular system
- Batch or single testing
- STAT Testing
- Multiparametric Testing

Quality

- Automation
- No carryover contamination
- Fluorescence reading
- Ready-to-use, bar-code-labeled reagents
- Self-testing
- On-board QC program
