

DCA Vantage™ Analyzer

Deliver Optimal Care with Clinical Confidence

Drive diabetes patient compliance with clinically proven and clinically relevant HbA1c1, Albumin, Creatinine, and Albumin-to-Creatinine (A:C) Ratio tests on the new DCA Vantage™ Analyzer. Simple enough to use in your office lab, and yet powerful enough to deliver lab-quality performance in point-of-care coordinated settings. It's the flexibility, ease and precision you've been looking for, in every setting.

Flexible Patient Data Management

Patient/Operator ID entry with touch screen or optional barcode

Results reporting: On screen, automatic to on-board printer, external printer and/or uploaded to LIS/HIS

HbA1c patient trend graph can be viewed or printed

On-board memory of 4000 results with powerful sorting capabilities

Easy transfer of on-board database from USB flash drive to PC

Testing Compliance in Point-of-Care Coordinated Sites

Flexible Quality Control Handling: Scheduled reminders or test lockout

Remote access for supervisors or POC coordinators

Adjustable correlation to reference methods

User defined reference ranges based on patient population

Key benefit from the new features:

- Data management tools to help drive more productive discussions between physicians/nurses and patients to help drive patient compliance

- Ability to automatically record patient results saves time and reduces chance for transcription errors

- Helps drive testing compliance necessary in decentralized sites as required by hospital point of care coordinator or lab supervisor
