GS Exam Light IV

#44400

GS 300  
General Exam Light

#44600

GS 600  
Minor Procedure Light

## Whiter, Brighter, and Greener

- **WHITER, BRIGHTER LIGHT:** 5,500 degree Kelvin white LEDs provide the caregiver with a superior, white light that provides enhanced visualization of the exam area, true tissue color rendition, and uniform spot—no dark or hot spots and no heat dissipation.
- **GREENER:** Among the first medical exam lights to feature LED technology, the GS Series provides a lower cost of ownership due to the elimination of bulb replacement and overall lower energy consumption.
- **INFECTION CONTROL:** Touchless auto on/off control reduces the risk of infections due to cross-contamination, and simplifies cleaning.

See second page for part numbers, unit quantities and pricing.
